Alternatives Workshop Committee – Suggested Format/Function

Brown and Caldwell (BC) suggests a small group setting for the workshop session—the Alternatives Workshop Committee—to be held in early or mid-December. The workshop will follow Waste Alternatives questionnaire-guided interviews between this AWC and local stakeholders/interested community members. The questionnaire, brief in format and content, is only intended to initiate discussions—in a sense, just as an “ice-breaker” to pique conversation about possibilities. Stakeholder insight from these discussions will then support a broader perspective to the AWC and the workshop. LCSWDC members and stakeholders that participate in the workshop session can then share information with the rest of the SWDC and public at its next regularly-scheduled meeting, allowing for a broader discussion and identification of next steps.

BC suggests the Alternatives Workshop Committee be comprised of participants/stakeholders representing a representative cross-section of both owner/operator and user-group representatives. This follows with a structure of:

- three Commissioners (representing Lenoir City, City of Loudon, & Loudon County),
- one Santek Waste Services, Inc. representative,
- three local industry representatives [Kimberly Clark, PSC Metals, Tate & Lyle], and
- One at-large community member.

This provides an even bias of Owner/Operator and Users, while keeping the group relatively agile and efficient in its mission. There is no need for an odd number of participants, since no votes will be tallied. The meeting can be open to the public, but outside input will be encouraged later at the next regularly-scheduled LCSWDC meeting.
