**Loudon County Planned Unit Development (PUD)**  
**Rezoning Checklist**  
**Section 2 Items Summary**

Chatuga Coves Planned Unit Development  
Heritage Land Development Partners, LLC

- a. A map showing street systems, lot lines, lot designs, and existing topographic characteristics.

*Sheet DP is enclosed to show an overall development plan for the proposed Planned Unit Development. An additional road systems map is included with this document to show a larger view of the overall existing road system.*

- b. Areas proposed to be conveyed, dedicated, or reserved for parks, playgrounds, swimming pools, recreation buildings, supporting commercial areas, similar public and semi-public uses.

*Sheet DP identifies the proposed common areas to be conveyed to the Community along with the proposed pavilion for community use.*

- c. A site plan for a typical building site and common open area, showing the approximate location and dimensions of all buildings, structures, setbacks and improvements and indicating the open spaces around buildings and structures.

*The enclosed Sheet DP provides an overall site plan for the proposed development and identification of proposed common area. An additional exhibit titled "Typical Lot Diagram" is included with this document to provide a more detailed outline of the typical building site.*

- d. Percent of property proposed for open and recreational space.

*The percentage of property proposed for open and recreational space (40.22%) is outlined within the Development Info section on Sheet DP.*

- e. Elevation and perspective drawings of all proposed structures and improvements. The drawings need not be the results of final architectural decisions and need not be in detail.

*Elevations and perspective drawings have been included with this submittal.*

- f. Drawings of all proposed common area landscaping. The drawings need not be the result of final landscaping decisions and need not be in detail.

*Landscaping has been shown on Sheet DP with the intent of illustrating screening around the detention facility and ornamental and shade trees spaced throughout the common areas. The large common tract is currently wooded and is intended to remain undisturbed for community use as noted on the plan.*

- g. A development schedule indicating (1) the approximate date when construction of the project can be expected to begin; (2) the stages in which the project will be built and the approximate date when construction of each stage can be expected to begin; (3) the anticipated rate of development; (4) the approximate dates when the development of each of the stages in the development will be completed; and (5) the area and location of common open space that will be provided at each stage.

*The proposed development schedule would be as follows: The start date would be as reasonably practical following approvals to move forward. Assuming the approvals move forward as expected that date would be approximately March 17, 2020. The stages of the development construction would be a) clearing and installation of erosion control measures, mass grading and installation of stormwater detention facility b) install underground utilities and storm drainage and c) final grade streets, install mountable concrete curbs and asphalt. The anticipated completion date for these items would be approximately June 1, 2020. The vertical construction would start immediately following completion of site construction and would be continued until all homes are completed. All common areas will be completed and landscaped as that area of the homesite construction is completed and, barring weather delays, the project would not be dormant or without activity for any period of time.*

- h. An off-street parking and loading plan.

*Parking will be provided within the driveways and garages of each proposed unit. An off-street parking area has been provided for the proposed pavilion and is shown on Sheet DP.*

- i. An estimate of population and density and extent of activities to be allocated to parts of the project.

*The project proposes no commercial uses; therefore, the population estimate would be 2 persons per unit (approximately 68 persons). Common areas are intended to be utilized by those persons.*

- j. The calculated density of the proposed development (gross land area/number of proposed units).

*The calculated density is 2.50 units per acre. This is shown on Sheet DP.*

- k. The general means of the disposition of sanitary waste and stormwater.

*Sanitary sewer will be coordinated with Tellico Village and designed/constructed in accordance with both Tellico Village and TDEC regulations, utilizing the pump system currently used within the area. Stormwater will be routed to a proposed detention facility (location shown on Sheet DP) and will be designed to adhere to all current regulations.*

- l. A tabulation of the land area to be devoted to various activities and overall densities.

*The tabulation, along with acreages of separate areas, of the common areas are illustrated on Sheet DP. Because there are no commercial activities proposed, all of the common area will be devoted to use by the residents.*
